

HEALTH PERSPECTIVES

JULY 2017

This infographic is part of a series that explores health from the perspectives of different populations. Developed using health survey data, they collectively demonstrate Coloradans' varying experiences of health and health care.

Hispanics and Latinos **are at an increased risk of poor health** due to a variety of social factors

Compared to all Coloradans, Hispanics & Latinos are:

\$ \$ 1.8X as likely to live in poverty

as likely
as likely

1.8X as likely to be uninsured

as likely to not have a high school degree

as likely to not have a high school degree

have shrunk since 2011

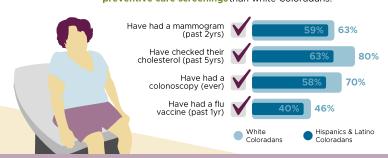

as likely to not have a high school degree

Although disparities remain, all of these gaps have shrunk since 2011

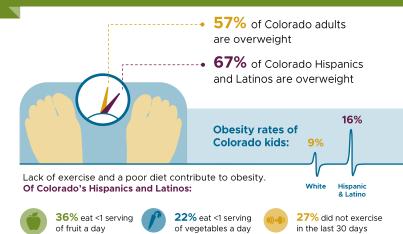

fair or poor health, compared to 13% of all Coloradans

Colorado's Hispanic and Latino population is going without important preventive care

Hispanics and Latinos are less likely to receive preventive care screenings than white Coloradans:

Furthermore, **obesity is a significant health concern** for Colorado's Hispanics and Latinos

Hispanics and Latinos face increased barriers to good health because of systemic and historic injustices. We must address the root causes of these disparities to ensure all Coloradans have the opportunity to live a healthy life.
